

TRANSFORM YOUR DIGITAL FORMS WITH FORMFACTOR

*Create Microsoft Power Pages
Forms in Minutes not Weeks*

Create secure dynamic forms in the Microsoft Power Platform

We believe you should be able to create a modern responsive form in the Power Platform without coding.

We've used our 1000s of hours of experience to create FormFactor, with an interface so simple it can be used by anyone in the business, to create a form in minutes to connect users and data faster.

Use FormFactor to:

- ✓ Replace processes
- ✓ Digitise forms
- ✓ Codify business logic
- ✓ Collect payments
- ✓ Submit attachments
- ✓ Stylize Forms
- ✓ Create secure portals
- ✓ Create forms internally & externally

**Power up your forms and

No-code Builder

Built for all users, from developers to non-technical staff, with an intuitive interface, automated database setup, and one-click deployment.

Dynamic and Flexible

Add dynamic features like conditional visibility and automatic calculations to your forms without coding. Improve completion rates and data quality with less need for instructions.

Secure & Stylish

Benefit from the security and scalability of Power Platform. Automatically deploy forms styled in your organisation's theme. Keeping your forms consistent.

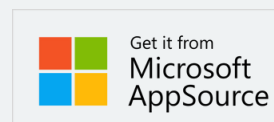

Kickstart Automation

Automatically capture data directly into Microsoft Dataverse, ready to kickstart workflows, enable secure AI, and integrate seamlessly with other business applications

Operational Efficiency

Streamlining processes and improving operational effectiveness.

Name of person(s) giving gift or benefit	Text	Required
Their relationship to the department	Text	Required
Details of gift or benefit	Text	Required
Estimated value	Numeric	Required
You may not be required to disclose this gift	Label Only	Optional
Benefit of accepting	Text	Required
Please provide	Label Only	Optional

1

Simple Form Creation

- User sets up the form via the FormFactor model-driven app.
- Configure the form pages, sections and questions using a simple, no-code experience in a Custom Page.
- Apply guidance and conditional validation during form creation.
- Single click deployment to Power Pages.
- Approval workflows to manage new versions.

Collect Key Information Quickly and Securely

- Links to forms can be shared to users or embedded directly into an existing site.
- Delivery is reliable using the Power Pages Content Delivery Network.
- End-users complete a step-by-step form with built-in styling, guidance, conditional validation using modern UI design best practices.
- Data transfer is secure utilising Power Pages and stored in Dataverse.

2

Workplace Health and Safety Incident Report

- Incident Details
- Incident Description
- Impact and Response
- Follow-up Actions
- Additional Information

Preventative Measures

Propose actions that could be taken to reduce the risk of this type of incident occurring again. Consider changes to procedures, equipment, or training.

Suggested measures to prevent similar incidents*

Further Investigation

Is further investigation required? Yes No

3

Review Data and Automate

- View each form response in its original layout within the model-driven app.
- Easily navigate through all data collected.
- Additional metadata is captured on submissions e.g.: submission timestamp, participants location, device used and time to complete.
- Automated workflows can be triggered creating integrations with Power BI, and other business systems.
- Use Power Apps and Copilot for real-time data handling, search, filtering, and export to formats like CSV and Excel.
- Create automated notifications to alert users of submissions and changes.
